

Submit Abstract | Special Sessions Submission Form

Please complete the form below, making sure that your proposed special session speaks to the congress theme “Transdisciplinarity and Transformation for the Future of Small-Scale Fisheries”. 'Special session' submission is open until **February 15, 2018** and you will be notified whether your session is accepted or not by **April 15, 2018**. If you have any questions, please email us at 3wsfcongress@gmail.com.

For ‘special sessions’, we are inviting submissions built around the main congress theme. Session organizers should ensure that the work in the session clearly speaks about the role of transdisciplinary perspective and transformations for achieving sustainable future of small-scale fisheries. If you are interested in organizing a session, please fill in and submit the following form.

Special session proposals will be peer-reviewed by the congress committee, based on the extent to which it addresses the congress theme and the degree of innovation and interaction in the session format. Note that we may be able to accommodate some sessions run in languages other than English. Please indicate if this is the case, and we will do our best to have ‘whisperers’ to translate the session into English for people who will be attending it.

Special Sessions

*Session Organizer Name

*Session Organizer Affiliation
