

Submit Abstract | Team Papers Submission Form

Please complete the form below, making sure that your abstract speaks to the congress theme “Transdisciplinarity and Transformation for the Future of Small-Scale Fisheries”. Abstract submission is open until **February 15, 2018**. Your abstract will be peer-reviewed by the congress committee and you will be notified whether it is accepted for presentation at the congress by **April 15, 2018**. If you have any questions, please email us at 3wsfcongress@gmail.com.

For ‘Team papers’, we are inviting submissions from projects or organizations whose work focuses on various aspects of small-scale fisheries. These could also be teams based on innovative collaborations between or amongst scientists, policy or practitioners. The papers should speak to the work done by the project teams and should showcase findings from more than one study location. The committee will select 4-5 ‘team papers’ submission for a special plenary session. Other accepted submissions will be presented as part of concurrent sessions.

Note: Submitting a team paper does not restrict you from submitting an additional abstract(s) for individual paper and/or special session.
